Material Aspects:

Virtu Americas LLC (NITE):

- A. US listed Security (NMS) non-marketable (add liquidity) orders executed equal to or over \$1 per share rebate of .0032 per share and execution quantity is equal to or greater than one share.
- B. US listed Security (NMS) marketable (remove liquidity) order executed equal to or over \$1 per share rebate of .0020 per share and execution quantity is equal to or greater than one share.

There is a potential conflict inherent to a market maker such as Virtu Americans LLC both paying for order flow and providing price improvement as the potential source of funds for each is the same namely the anticipated profit the market maker seeks to earn from executing or facilitating the execution of RQD* Clearing LLC customer orders. Accordingly from such anticipated profit a market maker such as Virtu Americas LLC can (i) forgo a portion of such anticipated profit to provide price improvement; (ii) forgo a portion of such anticipated profit to pay for order flow; or (iii) retain a larger portion of anticipated profit and not provide (or provide less) price improvement or not provide (or provide less) payment for order flow. A market maker's (such as Virtu's) anticipated profit must be allocated among these three sub-categories such that an increased allocation to any one subcategory will result in a decreased allocation to one or more of the other categories.

Furthermore, RQD* Clearing LLC and Virtu Americas LLC do not have any arrangements:

- that require RQD* Clearing LLC to meet certain volume thresholds or that provide incentives to RQD* Clearing LLC for meeting or exceeding certain volume thresholds;
- that require RQD* Clearing LLC to meet certain minimum volume thresholds or that provide disincentives to RQD* Clearing LLC for failing to meet certain minimum volume thresholds;

There is a potential conflict inherent to a market maker such as Jane Street both paying for order flow and providing price improvement as the potential source of funds for each is the same namely the anticipated profit the market maker seeks to earn from executing or facilitating the execution of RQD* Clearing, LLC customer orders. Accordingly from such anticipated profit a market maker such as Jane Street can (i) forgo a portion of such anticipated profit to provide price improvement; (ii) forgo a portion of such anticipated profit to pay for order flow; or (iii) retain a larger portion of anticipated profit and not provide (or provide less) price improvement or not provide (or provide less) payment for order flow. RQD* Clearing LLC routes customer orders in NMS securities that are options contracts to Susquehanna Financial Group LLP (sufi) to facilitate the execution and price improvement of client orders. Non-exchange third-party market centers compete for orders based on execution quality. There is a potential conflict inherent to a market maker such as Susquehanna Financial Group LLP both paying for order flow and providing price improvement, as the potential source of funds for each is the same, namely the anticipated profit the market maker seeks to earn from executing or facilitating the execution of RQD* Clearing LLC orders. Susquehanna Financial Group LLP generates revenue from executing or facilitating the execution of RQD* Clearing LLC customer orders. In exchange for such routing, RQD* Clearing LLC receives payment from Susquehanna Financial Group LLP (i.e., payment for order flow) in the amounts outlined in the above report and detailed below.

RQD* Clearing LLC's payment for order flow rate for options is reset monthly and applies to both single-leg and complex (multi-leg) orders, and to both marketable and non-marketable orders, as follows:

- A. Index options: no per-contract payment is received. Exchange fees are passed back to RQD* Clearing LLC.
- B. SPY options: a flat \$0.125 per executed contract.
- C. All other options: a base rebate of \$0.06 per executed contract, plus 9% of spread dollars, capped at \$0.75 per executed contract. Spread dollars are calculated as the average quoted spread multiplied by the 100-contract multiplier. The average quoted spread is calculated by RQD* Clearing LLC across all marketable single leg options orders, excluding single-listed options, for the prior calendar month, and is provided by RQD* Clearing LLC to each market center at the start of the month. For the month of September 2026 this rate was 0.6144 per contract.

No rebate is paid to RQD* Clearing LLC on sub-penny option contracts.

Furthermore, RQD* Clearing LLC and Susquehanna Financial Group LLP do not have any arrangements:

- A. that require RQD* Clearing LLC to meet specific volume thresholds or that provide incentives to RQD* Clearing LLC for meeting or exceeding certain volume thresholds.
- B. that require RQD* Clearing LLC to meet certain minimum volume thresholds or that provide disincentives to RQD* Clearing LLC for failing to meet certain minimum volume thresholds.
- C. for volume-based tiered payment schedules; or
- D. that require RQD* Clearing LLC to route any orders or a minimum number of orders to Susquehanna Financial Group LLP.
